*Photocells and Cat 3 monitored safety edges*

**Cycle :**

*100% Duty Cycle*

**Gate frame :**

*Mild steel Box Section*

**Supply Voltage :**

*230v 50Hz 6amp*

**Heavy duty Ball Bearing Hinge Assembly**

Made from high grade steel and powder coated these gates can easily withstand the demands of industrial sites such as docks and chemical plants.

The Control panel will be wired and its PLC programmed to the exact requirements of the site making sure the gates work how the client wants them to work.

Having the latest control technology allows us to control the gates in anyway possible, individual sites across the uk can easily be controlled via a PC at any internet point or Mobile.

Drive unit options will be discussed and the best solution for the site provided.

Rydan Automation have helped develop the exclusive RY380 HD, a floor mounted drive which can cope with spans upto 7m and can operate in storm conditions, nothing can match it !
